

Why Food Wastage is a Big Problem !!

About Feedr

Here at Feedr *waste* is a dirty word! Together we can reduce food wastage and feed hungry mouths all over New Zealand. Feedr is a web app that connects business owners and charities so that fresh, excess food can be saved from the rubbish bin and distributed to those who need it. Business owners simply need to sign up and add a listing when they have excess food to get rid of, and charities then have the opportunity to claim that item. Our aim is to facilitate the interaction between those who have food, and those who need it.
